Profile

Insightful Business Intelligence Analyst and Economist with experience of working for an e-commerce start-up working to successfully analyse data and identify promising business opportunities and potential problems. Superior skills in Data Science, Machine Learning and Econometrics and the ability to effectively apply technical skills, economic theory and people skills.

Employment History

Research Data Scientist at DatBiz Analytics, Harare

DECEMBER 2022 — PRESENT

- Effectively seek client relationships with long term interest and advantage.
- Created and presented portfolios of growth, pointing out key trends.
- Perform thorough research and analysis on data and create reports on research activities.
- Merge data with existing data sets, careful to keep old data sets and documentation
- Utilize Python and R programming tools to build helpful predictive models.
- Provided a quantitative framework for evaluating and analysing alternative techniques.
- Brought forth a strong understanding of research methods and data analysis.

Data Analyst, Accounting Clerk at Zimboshop, Harare

DEC 2021 — NOVEMBER 2022

- Managed cashbook and reconciled accounts receivables and accounts payable records
- Worked to improve the overall performance of the systems by assessing billing, workflow, and customer relationship management and productivity.
- Led process-improvement focus groups as part of the initiative to achieve functional design within user systems.
- Guided efforts to improve technology systems in a real and cost effective way.
- Worked well independently and also with others.
- Recommended and implemented changes that streamlined processes and improved usability.
- Brought forth excellent oral communication and interpersonal skills.
- Utilized superior data visualization and data management skills.
- During my time at Zimboshop, my work contributed to getting the company to an average of twenty-five thousand active customers each month in the first 3 months.
