Overview

Business Advisor and Analyst with expertise in client advisory, consultancy, data analytics, and strategic decision support. Skilled in translating data into actionable insights, optimising business operations, and building strong client relationships. Experienced in advising executives, driving operational improvements, and delivering measurable business impact across the telecommunications, retail and finance industries. Background in Economic Science and Applied Mathematics (Wits University).

Experience

Digitata Ltd (South Africa) | Business Advisor — Aug 2023-Present

Client-facing advisor and primary point of contact for key accounts, responsible for managing client relationships and leading day-to-day work streams. Focused on tracking business performance, advising client on strategy, overseeing operational adjustment work, and reporting on outcomes to communicate results and provide needed feedback.

- Act as the main liaison between clients and internal teams, ensuring strategic alignment and delivery of solutions.
- Track and analyse business performance metrics to guide client decision-making.
- Devise and advise on pricing and product positioning strategy, overseeing execution of operational adjustments.
- Develop analytics for Customer Value Management (CVM) campaigns and Pricing adjustments to evaluate the effectiveness of tools and strategies.
- Prepare and deliver executive-level reports and dashboards to translate insights into actionable strategies for Marketing and Business teams.

Key Achievements

- Expanded business influence with a major African telecom market leader by showcasing untapped value in under-utilised services.
- Successfully defended the company’s value proposition to new client leadership, securing continued collaboration.
- Led a proof of concept for a key client that converted into a long-term partnership.
- Built analytics dashboards that became central tools for client strategy and operational decisions.

Datbiz Analytics (Zimbabwe) | Research Data Analyst **May 2022- Jul 2023**

Worked as a data analyst and market researcher supporting client acquisition and strategy. Analysed prospective client data to map needs, assess positioning, and identify opportunities for value creation.

- Analysed business processes and product data to unearth meaningful insights.
- Built dashboards to visualise client business performance and behavioural trends and present findings.
- Developed quantitative frameworks to assess alternative strategies and provide data-driven recommendations.

Key Achievements

- Produced a report that informed a client on feasible strategic options given time, location and resource constraints.
- Delivered analytics and strategic reporting for a loyalty and rewards client expanding into micro-banking, providing customer segmentation and profiling to guide optimal allocation of finances and human resources for business growth.

Zimboshop (Zimbabwe) | Junior Data Analyst **Nov 2021- April 2022**

Worked as a Junior Data Analyst for an e-commerce start-up. I was tasked with analysing data generated from customer app-usage to identify possible bugs and broken processes leading to disruptions in service delivery or quality.

- Analysed app generated data to advise development team on potential bugs and improvements.
- Tracked app-based sales and payments and investigating failed or flagged transactions to assist Customer Care team in verifying customer complaints and addressing them promptly.
- Built reports to communicate findings with the product, sales and marketing teams.

Key Achievements

- My work was a significant contribution to the improvement of the app, leading to over 25% more returning users and 40% less purchase-related issues.

Education

University of the Witwatersrand, Johannesburg **2017-2021**

- **Honours in Economic Science**
    - Graduated with distinctions in Mathematical Economics, Financial Economics and Dissertation.
- **Bachelor of Economic Science**
    - Double Major in Computational & Applied Mathematics, Golden Key Student.

Courses and Virtual Internships
